

carNAVi S400 · GPS Navigation for Everyone

carNAVi builds GPS navigation solutions, that work straight out of the box. With the new S 400 carNAVi Corporation enters a more affordable price segment for GPS.

carNAVi S 400 sells for P6990

FOR IMMEDIATE RELEASE

October 26, 2011 – carNAVi Corporation is building its own navigation devices and the new S 400 is ready to enter the market as the **most affordable** professional navigation solution in the Philippines - ultra slim, with the newest Dual Core GPS/Galileo receiver, large **4.3-inch** high quality touch screen and multimedia functions with integrated MP3 and Video player.

carNAVi S 400 leads your way with voice guided turn-by-turn directions in English or Tagalog to get you there on time and keep you safe on the road. Preloaded with the latest high quality roadmaps covering the

whole Philippines including many thousand points of interest (POI) with perfected routing and address search, detailed maps of Malaysia and Singapore, it's compact, versatile and easy to use. Additional detailed maps of Cambodia, Indonesia, Vietnam, Taiwan, Hong Kong, Thailand and many other countries in Asia are available in the carNAVi Store online free of charge.

New features are the preloaded **Speedlimit and Road Alert warnings** to inform the driver in the case of overspeeding or warn affront bumpy railroads or sharp curves.

The maps contain detailed 3D view including elevated flyover, multi-layer streets and buildings with smooth map updates. Whenever a re-routing is necessary, the software calculates within seconds a new route or detour to your desired destination. carNAVi devices do a reliable routing even from island to island, it is useful for Trans-Philippine highway driving!

carNAVi S 400 has an unique ultra slim design (only 13mm) with a large 4.3-inch non glare widescreen display. Outside the car its rechargeable lithium-polymer battery makes it convenient for mobile navigation on foot with up to 3 hours' usage between charges.

Powered by a SiRF Atlas V DUAL CORE processor with 128MB RAM and 2GB build in memory for navigation maps, carNAVi S 400 is faster than most other GPS receiver, needing lesser energy for longer battery life and faster satellite detection. The S 400 is Galileo ready, future compatible to the new more accurate navigation standard.

All GPS Navigation units will come 'ready to run out of the box'. Accessories like a windshield mounting unit and a car power cable are already included. Just unpack and start with your personal navigation assistant!

carNAVi S 400 GPS navigation units will be available on November 30, 2011 for **PHP6.990**.
